"Simplicity itself"

## Simplicity by Design

Your front door is the focal point that creates that vital first impression of your home. With Simple Lite, exclusively from Rockdoor, that first impression you create will exude quality, style and security.

Rockdoor is the leading name in composite doors, often 'asked for by name' by thousands of homeowners across the country. A Rockdoor not only provides kerb appeal for your property, it also offers unparalleled strength and security for you and your family.

# Simple Lite

Rockdoor is offering a bright vision of the future, with its stunning, new Simple Lite glass designs. Unique to Rockdoor, the innovative Simple Lite technique applies a liquid pattern to satin glass to create a subtle and stylish etched effect. The design can be highlighted in crystal clear or anthracite to suit your home.

Rockdoor's Simple Lite satin glass has been specifically engineered to transmit almost as much natural light into your home as clear glass, whilst obscuring the view. It offers homeowners the best of both worlds – light in abundance and privacy too! The sunlight allowed into your home through Simple Lite glass is cleverly diffused so the soft and natural light it creates will permeate further into the room than any ordinary glass would permit.

## Unparalleled Security

In addition to good looks, Rockdoor also boast levels of security which are unmatched in the industry. All doors surpass industry standards including PAS 23 & 24 and can be Secured by Design compliant.

However, the collection is not only aesthetically striking and ultra secure – Rockdoor can now design match the glass in your sideframes to match the door itself and create a visually stunning look which will set your property apart from that of your neighbours (see page 13 for more details).

As an added bonus, Simple Lite glass designs and sideunits are durable and easy to clean as the design is encapsulated within the double glazed unit so the surfaces are smooth overall.

# When only the best is good enough

This saying truly embodies what a Rockdoor is all about. Design, build quality and unrivalled security blend together in spectacular fashion to produce a truly stunning door. A Rockdoor will keep you safe and secure - if you get the opportunity to 'open and shut' one you'll immediately see why for yourself!

## Performance as standard

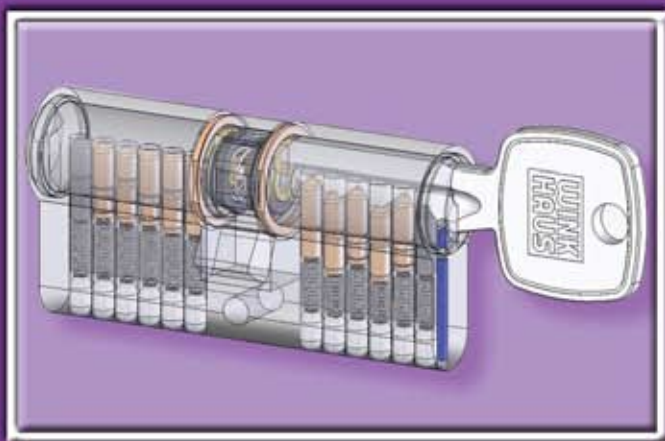

Having produced more than quarter of a million doors, Rockdoor have developed designs and enhanced engineering to create the perfect door - one we're proud to put our name to. Doors need to perform like never before. Security, aesthetics and environmental credentials are no longer optional, they are mandatory.

## Sleep soundly

Disturbingly, one home in the UK is burgled every 37 seconds. By fitting a Rockdoor you can be assured that your family and your belongings are secure. Reassuringly strong and seriously secure, a high performance Rockdoor is something you can rely on. Rockdoor features a unique 'inner frame' which is specially designed to hold all the locking components. This makes it incredibly strong and virtually impossible to break through.

# What makes a Rockdoor so secure?

- Multi point locking systems, using incredibly strong Brass and Nickel hooks exclusive to Rockdoor.
- Secure steel drill plates which prevent the locks being drilled out.
- Cylinder guard protectors fitted as standard to prevent the lock from being snapped.
- Locking cylinders that prevent lock bumping.
- Outer frame just as secure as internal frame.
- Aluminium and polypropylene reinforcement used on both outer and inner frame.
- Internal steel mesh making the door almost impossible to cut through. (optional)
- 50mm door leaf as standard.

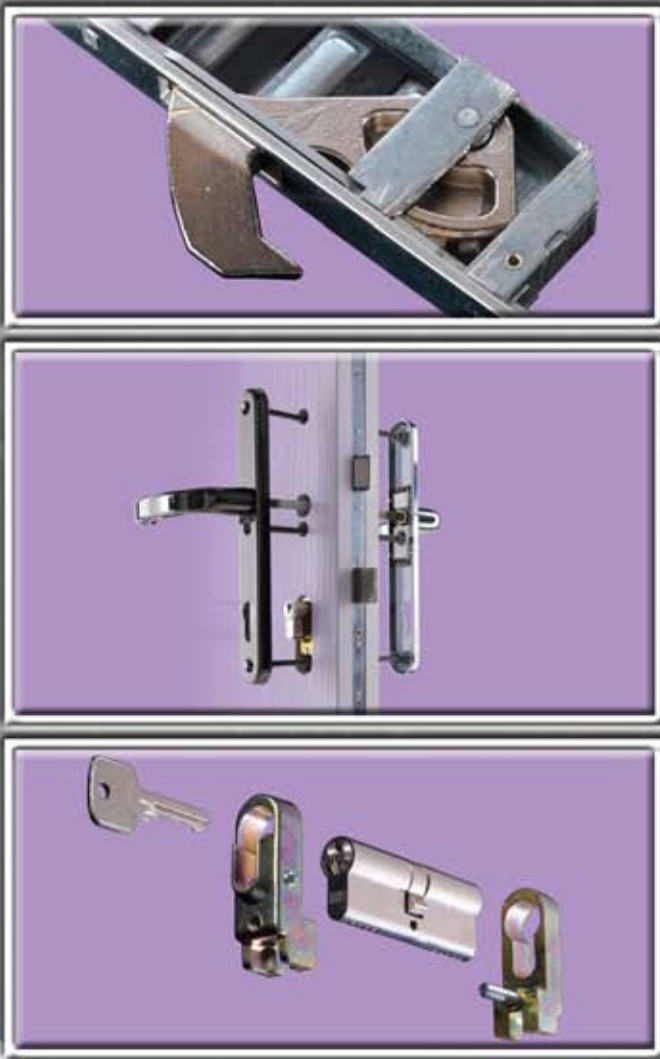

## Bumping

Bumping is a simple method of releasing a lock with minimal effort, using readily available tools and leaving no visible sign of attack. You'll be glad to know Rockdoor has a cylinder lock especially designed to prevent bumping. All our locks are independently tested by the UK Locksmith Association.

# 35% Stronger

Recent independent tests have further reinforced Rockdoors strength. The tests featured a typical Rockdoor against a typical GRP composite from a leading competitor. The results were conclusive – Rockdoor outperformed its rival by 35%. Source : Winkhaus TR996

## Secured by Design

To give you reassurance, Rockdoor manufactures in accordance with Secured by Design, a Police backed accreditation. Therefore you can be confident that Secured by Design Rockdoors leaving our state-of-the-art production line meet with your local police forces approval. To ensure your door meets the Secured by Design requirements please specify Laminated Glass and a 6 Pin Locking Cylinder when ordering your Rockdoor.

## Multi point hook locks

Rockdoor hook locks are manufactured from solid Brass and coated in Nickel which engage into steel keeps running the full length of the outer frame to prevent the door from being prised open. Rockdoors - Anti Drill - Anti Pick - Anti Bump - Anti Snap = ANTI WORRY.

## Cylinder & Cylinder Guard

Rockdoor features an extremely strong highly reinforced Zinc die cast cylinder guard protector, preventing the locking barrel from being snapped deterring forced entry.

# U- value & thermal efficiency

Your Rockdoors will perform to the highest standards, irrespective of the weather. Thermal efficiency is paramount as it substantially reduces your fuel bills and carbon footprint. Rockdoors are evaluated on the performance of the entire and achieve a U-value of 1.1 -1.7 W/ mK making them Document L compliant.

## Green credentials

- Made from PVC-U which can be recycled 10 times.
- Truly 'made to measure' doors for less wastage.
- Inner frame 90% recycled PVC-U.
- Reinforcing 100% recycled.
- All off-cuts separated and recycled.
- No glass aperture cut-outs disposed of in landfill.
- 30 year life expectancy.

## Rockdoor accreditations

Every Rockdoor produced is subject to rigorous safety and quality standards. Rockdoor's benchmark for testing is often set above that of external bodies.

ISO 14001: The international standard that specifies a process for controlling and improving an organization's environmental performance.

ISO 9001:2000 Quality Assured standards are set with Rockdoor to operate to agreed procedures, processes systems and improvements.

BSI Kitemark: Rockdoor is accredited by the British Standards Institute.

✓ PAS 23 PAS 23-1: 1999 General performance requirements for door assemblies.

✓ PAS 24 PAS 24-1: 1999 Enhanced security performance requirements for door assemblies.

Secured by Design: Ensures products are designed, manufactured and tested in accordance with strict rigid guidelines. For more information about Secured by Design Rockdoors please ask your representative.

Heat Shield: Woodgrain Rockdoors are protected by Heat Shield technology.

10 Year Guarantee: Rockdoor's are guaranteed for 10 years from the date of installation, if fitted in accordance with Rockdoor's installation procedure. Terms & conditions apply, please see website for more details.

# Star Lite

All Star Lite glass designs are available with stunning matching sideunits/fanlight units. See page 13 for more details or visit [www.rockdoor.com](http://www.rockdoor.com).

## Radiance, Brilliance & Aurora

## Glass Options

Simple Lite glass designs are available in Crystal or Anthracite. Crystal provides a translucent effect to the glass, whereas Anthracite gives a more traditional appearance. For illustration purposes, all White

studio shots (on page 10 & 12) are shown with Anthracite, and location shots throughout the brochure are primarily Crystal.

As the designs are individually crafted, they may contain tiny air inclusions and could appear slightly uniform which is considered an authentic attribute of the unique liquid pattern. All designs in the Simple Lite collection include clear backing glass as Standard (excluding Secured by Design). The designs are encapsulated within the double glazed unit for ease of cleaning.

# Matching sideunits & fanlights for Sunrise & Star Lite designs

Adopting the same technique as the glass design for the door; the sideunits are created with a liquid pattern design on stylish satin glass. This allows maximum light in, while keeping prying eyes out.

## Sunrise

Many combinations of sideunit and fanlights are available as shown above. For illustration purposes the drawings show the options available for the Sunrise.

For illustrations of the Star Lite sideunit and fanlight options please visit [www.rockdoor.com](http://www.rockdoor.com). Minimum & maximum sizes apply.

## Heat Shield technology

Doors are prone to high levels of heat absorption. Allowing such high levels of heat, often up to 100°C, to be absorbed into the door itself can cause problems.

Rockdoor however now has the solution. Heat Shield technology, which comes as standard on all our woodgrain doors, reflects all of the NIR rays of the sun helping to keep the surface temperature to a minimum. This means your door will perform perfectly no matter what the weather.

heat **SHIELD**

1. Low Aluminium Threshold  
(Document L compliant)  
(Suitable for Tie-Bar)

2. Slim PVC-U Threshold

3. Full PVC-U Threshold

## Threshold

Choose a threshold to suit your lifestyle. Our most common threshold is option 1 as this is suitable for wheelchair and pram access.

## Easy to clean

Simple Lite glass designs and sideunits are durable and easy to clean as the designs are encapsulated within the double glazed unit.
